

Static Pool

6 x 16 bytes

The diagram shows a large rectangle divided into six vertical columns of equal width. A horizontal line is drawn across the top of the first four columns, and a box containing the text '6 x 16 bytes' is placed above this line, spanning the width of these four columns.

2 x 64 bytes

The diagram shows a large rectangle divided into two vertical columns of equal width. A horizontal line is drawn across the top of the first column, and a box containing the text '2 x 64 bytes' is placed above this line, spanning the width of this column.

4 x 32 bytes

The diagram shows a large rectangle divided into four vertical columns of equal width. A horizontal line is drawn across the top of the first two columns, and a box containing the text '4 x 32 bytes' is placed above this line, spanning the width of these two columns.

1 x 128 bytes

The diagram shows a large rectangle with no internal vertical or horizontal lines, representing a single block of 128 bytes. A box containing the text '1 x 128 bytes' is placed inside the rectangle.
